## Chapter: 1

# Our Education Culture

India is an under development country and shown a significant progress in education during last five decades. Efforts from the governments and the people towards education are pretty good. A lot of progress towards human development is being seen.

Our education culture has become capable to enable people to get them educated, strengthen knowledge, improve life styles and to enhancing luxuries. This way, life styles are becoming materialistic day-by-day and more-and-more.

But this is not enough. Educated people are seen unhappy and suffering from their education and success. They are not happy. Majority of them are neither satisfied nor happy with their educated life. People are stressed, tensed and remain busy all the time.

**Success comes where career and passion meets together –**

**Lokman Singh**

Definition of being social seems to remain on social networks only. Real happiness and cheerfulness has gone away and satisfaction is found in books only.

It looks like we Indian are going elsewhere. We are going down in happiness rank every year. In year 2013 we were on 111<sup>th</sup> Rank in world and in year 2017 it was on 118<sup>th</sup>. In happiness, we are below than neighbouring countries like Somalia, China, Bangladesh and even from Pakistan. What are the reasons behind it? We are doing development everywhere then what is missing.

Various surveys and society research revealed that this kind of education is not enough. Most of the people are doing the work they don't like and whatever they like, they couldn't get to do. Now there is a requirement to make it quality education in accordance with the personal, mental, social and environmental needs.

Current education culture is focusing to make the maximum people educated. The way is not enough to prepare the individuals to face and win over the challenges of real life and the society.

**Most of the people are doing the work they don't like and whatever they like, they couldn't get to do.**

– Lokman Singh

## **Outcomes of current Education Culture:**

- Majority of children are in schools by force not by choice.
- Children are pressurised to study not motivated.
- More than 90% students do not have clarity about their career and aim to study.
- A survey by IBM reveals that higher education system in India is antiquated.
- A study by ASSOCHAM says that 93% of MBA students are unemployable. Students are spending lakhs of rupees on their education. Most of them are not getting the right job and are working for Rs. 8000-10000 per month whereas factories and business units here are suffering with non-availability of people on these rate.

Our ex-prsident Hon'ble Sh. Pranab  
Mukharjee said

**"If the situation is not reversed quickly, we will land ourselves in a scenario of having a large number of people with degrees but not enough manpower with proficiency to meet the emerging requirement of our industrial and other sectors."**

- Majority of them study unwillingly the curriculum of beyond their choice. A study by HT says that Indian Education System fails in producing job-ready graduates.
- India has one of the highest rates of suicides among people aged between 15 and 29 (taken by [www.studyin-uk.in](http://www.studyin-uk.in)). Failures in examination, unemployment are the reasons among to put the life at risk.
- Students from science stream goes into further stress by giving entrance exams for different universities and colleges. And the competition here is fierce!

**Our education culture is more inclined towards memorization and takes long systematic study hours thus leaving less time for recreational activities, and socialization which is an essential part of the development of a child.**

**The best time of the life that students are supposed to enjoy and cherish is the time they are pushed to extreme levels which can be overwhelming for many.**

-Studyin.uk.in

## **Advantages of current Education Culture:**

- Life is becoming materialistic.
- People are getting more and more resources for life. Life is becoming luxurious.
- The current generations are better than earlier all generations on this planet.
- Almost all the materialistic requirements are being fulfilled.

## **Disadvantages:**

- Smile is missing.
- Happiness is missing.
- Real success is missing.
- Living artificial life away from natural one.
- Most people live to regret their career choices.
- Suicide cases are increasing.
- Mental and physical illness is increasing.

**You can only become truly  
Accomplished at something you love.**

**Don't make money your goal.**

**Instead pursue the things you love  
doing, and then do them so well that  
people can't take their eyes off you.**

-Maya Angelou

## Role of Parents

**P**arents play a significant role in the success of the students. In Indian education culture, majority of the students feel pressure from parents to do well in exams and even before that. There have been many incidents in the past where students have committed suicide during exams and on the result day.

This is a matter of discussion before us that what can be so extreme that students decide to end their lives?

The Psychologists suggest that students suffer from anxiety and traumatic disorder relating to fear of examination. The fear factor is the reason why students suffer from anxiety, depression, and the following consequences. And the fear not only comes from the school but also from parents, who go to extreme levels to push their children into getting better grades.

Fear of failure to do well in studies is causing anxiety among students which has substantial negative effects on their academic and social success. The self-worth of a student is determined by the academic success and grades, and not on the basis of

individual qualities they already do possess. Parents try to get rid of cable connection, internet, computer, only to ensure that their children could concentrate and get better grades.

In a survey, two-third students reported that their parents pressurize them for better academic performance and the pressure from non-graduate parents was more compared to parents those were graduates and post graduates.

The emphasis is so much so on the better grades that students forget the fun element in learning. Anything can be made interesting if taught well. So, it's not only the students who underperform, teachers underperform too. Sadly there are no criteria to judge the grades of a teacher. More than 50% 12th students admitted of having more than 3 private tutors. Why are you paying schools such high tuition fees if eventually the students are going to study from private tutors?

**Empower children to  
make choices, decisions and  
steer their life themselves;  
not influence.**

## Career Awareness

**M**ajority of students are either studying unwillingly or the subjects of beyond their choice. Students often opt option for their career under influence. General practice to decide the career is under parental influence and societal pressure. They decide career considering fame and monetary benefits. The practice is to imitate others, too. The youth study the available options and choose the one from the very popular options around. Similarly they do in selection of jobs. Whatever job they find or get available for them, they have to opt it for livings and life.

**YOU HAVE BRAIN IN YOUR HEAD.  
YOU HAVE FEET IN YOUR SHOES.  
YOU CAN STEER YOURSELF IN ANY DIRECTION YOU  
CHOOSE. YOU'RE ON YOUR OWN.  
AND YOU KNOW WHAT YOU KNOW.  
AND YOU ARE THE ONE  
WHO'LL DECIDE WHERE TO GO.**

-Dr. Sues

There is lack of awareness in students, parents, schools, colleges and the society about vast range of available courses and career options. There are thousands of courses and career options available to opt for.

Outcomes of this all are that the students study the course or subjects half-hearted and do jobs unwillingly. They dedicate themselves less and hence get result and success less accordingly. They get neither happiness nor satisfaction and when they see others getting success then get frustrated, unsatisfied, disturbed, anxious, tense and depressed. This way majority of the students remain away from the real joy of the life.

**I am only one,**

**but I am one.**

**I cannot do everything,**

**but I can do something.**

**And because I cannot do everything,**

**I will not refuse to do the something**

**that I can do.”**

**-Edward Everett Hale**

## What to do?

Life is a precious gift. It should be lived in natural manner. Natural manner refers here the joy and happiness which is the basic requirement to live. Life should be lived happily and joyfully. It should be as simple as nature. Happiness and satisfaction are the key requirement of a natural life. It is possible when life is given a purpose and vice versa.

The source of success is happiness. Source of happiness is satisfaction. Satisfaction comes after achievements. Achievement comes after interestingly dedication in the work of choice.

Everyone learns differently and students could develop their own plans on how to study for long hours effectively, and parents and teachers could help them develop their own learning methods.

Also, the need of hour is to decide the courses and careers as per abilities and choices of the students. This is the most important aspect and requirement of our education culture. Now the stage has come to make the necessary improvement in our learning culture.

With starting of board examinations, what every parent should know is, it's just exams, not the end of the world. The success of someone lies in what they chose to do with their resources, the actions they take, and not on the grades.

## **A school principal in Singapore sent this letter to the parents before the exams**

*The exams of your children are to start soon. I know you are all really anxious for your child to do well.*

*But, please do remember, amongst the students who will be sitting for the exams there is an artist, who doesn't need to understand Math. There is an entrepreneur, who doesn't care about History or English literature. There is a musician, whose Chemistry marks won't matter. There's an athlete, whose physical fitness is more important than Physics. If your child does get top marks, that's great! But if he or she doesn't, please don't take away their self-confidence and dignity from them. Tell them it's OK, it's just an exam! They are cut out for much bigger things in life. Tell them, no matter what they score, you love them and will not judge them.*

*Please do this, and when you do, watch your children conquer the world. One exam or a low mark won't take away their dreams and talent. And please, do not think that doctors and engineers are the only happy people in the world.*

*With warm Regards*

**DON'T MAKE THE CHILDREN FEEL LIKE  
THEY ARE NOT GOOD ENOUGH.**

**A Career**  
**is not just about**  
**earning an income**  
**It is about**  
**pursuing the essence of**  
**your life.**

-Terry Mante

## Chapter 2

# Career Development

One's career development is a lifelong process that began when they were born. There are a number of factors that influence one's career development, including one's aptitude, personality, interests, abilities, values, background, and circumstances. Career Counseling is a process that will help one to know and understand themselves and the world of work in order to make career, educational, and life decisions.

Career development is more than just deciding on a course and what job one wants to get when they graduate. It really is a lifelong process, meaning that throughout one's life one will change, situations will change, and one will continually have to make career

**If you want to live a happy life, tie it to a goal, not to people or objects.**

*-Albert Einstein*

and life decisions. The goal of Career Counseling is to not only to help one make the decisions that are needed to be made now, but to give the individual the knowledge and skills that are required to make future career and life decisions.

Before learning about career guidance and counselling, this is necessary to us to know the basics of job, work, career and occupation.

**Job** is a work done for money. It's short term work in a position of employment. In job one is paid in exchange of labour/ work. Example: a clerk in an office.

**Occupation** is an activity done for long time by a person to earn his livelihood. In occupation, the same and similar job duties are performed for long time. Examples: Teachers, physicians.

**Profession** is an activity that requires specialized training, knowledge qualification and skills. When a professional is paid for his skill or talent, it is called as occupation. Example: Lawyers

**Career** is a journey for entire life. It is also called "career path." As we work in jobs, we build skills, knowledge, and experiences. Our career includes education, training, work experience, and community

involvement. It also includes unpaid work and hobbies.

The difference between a job and career is that a job is the work we do to make money, while a career is working towards goals and dreams. Having a career and excelling in it is the closest that a person can ever come to being a god.

**Mission** directs the passion to accomplish something; mission puts passion into action. The mission, however, is given life by an achievable outcome. The outcome is given life through action steps.

Action steps create the process by which achievement is made. Consider this. You can have a mission without passion. You can have a goal or outcome without a mission. You can have an outcome without action steps. The four concepts work together to create a solid ideal for success at the highest level.

Passion, mission and action start with an Outcome. Without a clear outcome, the other positions are like a ship without a rudder.

**YOUR VISION OF WHERE OR WHO YOU WANT  
TO BE IS THE GREATEST ASSET YOU HAVE.**

-Paul Arden.

# IKIGAI

Ikigai is a Japanese term meaning 'reason for being'. According to Japanese culture, every one of us has an ikigai.

Ikigai is often described as an intense internal burning desire to carry out a personal mission that we have a strong affinity to. An ikigai is essentially 'a reason to get up in the morning'. It is a reason to enjoy life. Your ikigai lies at the center of those interconnecting circles. If you are lacking in one area, you are missing out on your life's potential. Not only that, but you are missing out on your chance to live a long and happy life.

## Chapter 3

# Career Guidance and Counseling

**C**areer Guidance is the assistance to the students or people in making choices for their education and occupation.

In simple words it is the activity to get or provide advice from the experienced people to make career choices.

Career counseling is a comprehensive activity to assist students and people to not only make choices for their education and occupation but to help them making fulfill them also.

Career counselling is basically a process to understand own self by the individual as well as the

**Career counselling  
is basically a process  
to understand own self by the individual  
as well as the world of work better  
in order make career and life decisions.**

world of work better in order make career and life decisions. It is a form of guidance to young students to take them on the right path towards the right career which is one of the most important phases of adulthood.

A collective program of career guidance and counseling develops an individual's competencies in self-knowledge, educational and occupational exploration, and career planning. It helps in finding direction in life.

In a career counseling session, the counselor will help a person explore skills and strengths, consider education levels and give advice about education, and determine interests and personality type.

Counselors administer various tests mainly Aptitude, Personality, and Interest, IQ and EQ and advice for educational and career options.

### **Benefits of Career Counseling**

Career counseling benefits to youth and adults, male and female, disabled, disadvantaged, minorities, limited English proficient, incarcerated, dropouts,

**DECIDE CAREER WISELY,  
DEVOTE YOURSELF TO IT,  
STRUGGLE ON IN PATIENCE,  
AND THE SUN WILL RISE FOR YOU.**

single parents, displaced homemakers, teachers, administrators, parents, employees and employers.

Students gain the most out of career counseling as they are the ones under immense pressure of academic performance, parental influence and societal pressure.

Seeking career guidance facilitates them to choose a career pathway where they are likely to succeed. Career counseling is also very effective for professionals and adults who do not find satisfaction and fulfillment in the work they do. The main benefits are: –

**1. Self-Knowledge:-** They get to know themselves – their high potential aptitude areas, their interests and their personalities, which are later, linked up to the careers that are suggested to them.

**2. Objective Guidance:-** Lot of people influence the career decision-making process and often, that influence is subjective in nature. Parental influence, sibling influence, peer influence, environmental influence – all of it could be biased and based on certain perceptions about the client, or the career or the job role etc. A counselor helps the client to identify a career from an objective and unbiased perspective.

**Whatever makes you happy, you can decide it for your career.**

**3. Career Awareness:**– An important aspect of career guidance is to get knowledge of the possible career options available to the client. It helps the client to make an informed decision not only in terms of knowing him/her self but also in terms of knowing the various career options available.

**4. Conflict Resolution:**– It basically helps to evade confusion pertaining to the various courses and careers. Once a detailed exploration of all careers is done, the client and counselor can jointly discard some of the options in the process only to come up with the most appropriate ones.

**5. Gaining perspective:**– At the end, the client has gained a perspective regarding his or her career pathway. The client is relatively clearer and confident about the chosen career pathway and is motivated to work on the same path.

**Your life ahead will be the result of the choices you make, now. Make choices wisely.**

To be successful, the first thing to do is to make the career choice.

## Chapter 4:

# Passion to Profession

Passion is something that you love doing and help you to bring your potential out to do excel and to enjoy your life.

Steps to turn your passion into your career.

1. **Identification:** Passion should be identified first and in well manner. Differentiate between your hobbies and passion. Hobbies are your likings but it's not necessary that your likings give you excellent output. The hobby which you pursue most and gives you more and innovative output can be your passion to turn into the career.
2. **Demand:** Determine the level of demand for your passion in the market and choose a field to map it.
3. **Requirements:** Estimate the requirements to make the career in this field. Conduct a detailed search on what it would require to start and to persue the career in this field. It may be some machinery/ equipment, or knowledge, course/ degree, or special training. You may even need to hire employees or solicit funding.

Discuss with the people who are in a similar business. Learn what they did to succeed and follow their path.

4. **Action Plan:** Make an action plan of the steps you need to take to make your passion a realistic career opportunity. Include what you need to do and how much you need to spend before you launch into your new venture. Also, always have a back-up plan in case Plan A doesn't work out.
5. **Execution:** Do execute the plans with your 100% dedication.
6. **Be flexible:** Your road is not always going to be smooth in line with the planning and desires, so it's necessary to remain flexi for adjustments along the way. Be open to advice and criticism; other people's insights may open your eyes to something new. No one can succeed alone. That's why it's important to surround yourself with talented individuals who can advise you to take the right decisions. Take feedbacks from the market and the people around.

**Success comes where career and passion meet together.**

## Chapter 5:

# Careers Bank

**T**here are many thousands career options available across the globe but we are still stuck on few popular names like Engineer, Doctor, Banker, Lawyer and Civil Services.

In general, careers are categorized in two types.

1. Professional Careers
2. Vocational Careers

Professional careers are occupations that require specialized qualification and training about the profession like Chartered Accountancy, Law, Teaching, Architecture, Pharmacy, Medicine, and Engineering. It requires qualification from college/ university. These are:

### **1. Humanity, Arts & Social Sciences**

Educationist, Politicians, Human Development and resourcing professional, Administration professional, Anthropologist, Archeologist, Clinical Psychologist, Dance Therapist, English Literature, Geographer, Hindi Literature, Sanskrit Literature, Historian, Home Science, International Relations, Liberal Arts, Librarian/ Digital Curator, Foreign Languages, Philosopher, Political Scientist, Psychologist, Social Worker, Social/ Human Development Professional, Sociologist, Nature & Environment Professional, Event Organizing Professional, Content Writers & Linguist & Geographer.

## **2. Hospitality, Transport & Tourism Services**

Indian Railway Officer, Commercial Pilot, Roadways Managers/ Officer, Cabin Crew, Travel & Tourism Professional, Hospitality Services Professional, Chef, Food and Beverages Service Manager, Hotel Management, Supply Chain Managers, Warehousing Manager, Cargo Managers, Courier & Mail services Manager, Catering professional, Housekeeping Manager, Front office Professional, Ship Crew, Restaurateur & Hotelier.

## **3. Fitness & Well-Being**

Yoga professional, Physiotherapist, Nutritionist, Sports Psychologist, Fitness Consultant, Sports Coach & Sports Manager.

## **4. Mass Communication**

Advertisement professional, Film Maker, Director, Cinematographer, Public Relation Professional, Media Studies, Media Manager, Publishing Professional, Radio Jockey, Television Anchor, News-reader, You tuber, Copywriter & Media Programmer.

## **5. Journalism**

Journalist (Electronic Media), Correspondent, Creative Writer, Content Writer, Editor, Fashion Journalist, Sports Journalist, Blogger, & Journalist (Print Media).

## **6. Agriculture Science**

Agricultural Biotechnologist, Agricultural Scientist, Agronomist, Animal Scientist, Dairy Technologist, Food

Scientist/ Engineer, Forestry Professional, Horticulturist, Plant Scientist & Soil Scientist.

## **7. Animation & Graphics**

Animator, Game Designer & Developer, Graphic Designer, Illustrator, Multimedia Technologist, Web Designer & Fashion Designer.

## **8. Architecture & Planning**

Architect, Construction and Infrastructure Manager, Design Engineer & Planners.

## **9. Art & Design**

Artist (Fine Arts), Ceramic & Glass Designer, Fashion Designer, Footwear Designer, Product Designer, Interior Designer, Jewellery Designer, Print Making, Sculptor, Textile and Apparel Designing, Visual Communication Designer &, Visual Merchandiser.

## **10. Performing Arts**

Actor, Dance, Model, Musician, Photographer, Singer, Theater Artist, Technologist, Editing, Music Composer, Choreographer, Singing professional & Dancing professional.

## **11. Sales & Marketing**

Digital Marketing Expert, Direct Marketing Professional, Image Consultant, Brand Builder Professional, Marketing Manager, Market Research Professional, Media Planner Professional, Sales Manager & Sales Promoting Professional.

## **12. Education & Teaching**

Teacher, Lecturer, Professor, Translator, Writer/ Author, Special Education, Counselor, Academic Research Associate/ Fellowship, Clinical Psychologist, Counselor,

Education Administrator, Foreign Language Teacher & Placement Officer.

**13. Business Management**

Actuary, Business Manager, Entrepreneur, Event Manager, Wedding Planner, International Business, Marketing Professional, Operations Professional, Logistics Professional & Supply Chain Professional.

**14. Finance & Banking**

Banker, Chartered Accountant/ Auditor, Company Secretary, Cost and Management Accountant, Economist, Financial Planner, Finance Analyst, Equity Research Analyst, Insurance Professional, Investment Portfolio Manager, Micro finance professional, Risk Manager, Stock Broker & Tax consultant.

**15. Government & Defense Services**

Indian Army Officer, Indian Air force Officer, Naval Officer, Police Officer, Civil Services Officer, Indian Coast Guard Officer, Central Reserve Police Officer, BSF Officer, CISF Officer & Income Tax Officer.

**16. Legal Services**

Advocate/ Litigator, Lawyer (Criminal Law), Lawyer (Civil Law), Lawyer (Corporate Law), Lawyer (Cyber Law), Lawyer (Human Right Law), Lawyer (Intellectual Property Law), Judiciary Officer, Judge, Judicial Magistrate, Legal Consultant, Conciliator/ Arbitrator & Law Professor.

**17. Science & Mathematics**

Statistician, Mathematician, Physicist, Biologist, Botanist, Chemist, Data Analyst, Data Scientist, Environment Scientist, Forensic Scientist, Micro

Biologist, Oceanographer, Zoologist, Wildlife Scientist & Microbiologist.

## **18. Engineering & Technology**

Astronaut, Aeronautical Engineer, Agriculture Engineer, Automobile Engineer, Automobile Designer, Biochemical Engineer, Biomedical Engineer, Chemical Engineer, Civil Engineer, Computer Engineer, IT Engineer, IT Manager, System Manager, System Administrator, Programmer, Ethical Hacker, Animator, Game Designer, Web Designer, App Developer, Web Software Developer, Electrical Engineer, Electronics & Telecommunication Instrument Engineer, Energy & Environment Engineering, Engineering Design, Engineering Physicist, Food Engineer, Food Scientist, Geological Engineer, Industrial Engineer, Marine Engineer, Material Engineer/ Scientist, Mechanical Engineer, Metallurgical Engineer, Mining Engineer, Nuclear Engineer, Petrochemical Engineer, Process Engineer, Production Engineer, Rubber & Plastic Technology Engineer & Textile Engineer.

## **19. Medical Sciences**

Cardiologist, Anaesthologist, Hematologist, Nephrologist, Neurologist, Neonatologist, Endocrinologist, Dentist, Physician, Radiologist, ENT Consultant, Forensic Medicine Specialist, Gynecologist, Medical Scientist (Anatomy), Medical Surgeon, Eye Surgeon (Ophthalmologist), Orthopedic Surgeon, Pathologist, Pharmacologist, Physiologist, Radiation Oncologist, Veterinary Science Professional, Urologist,

Gastroenterologist, Dermatologist & Plastic Surgery Specialist.

## **20. Medical Support**

Audiologist, Ayurveda Doctor, Clinical Research Associate, Homeopathic Doctor, Medical Lab Technologist, Nurse, Nutrition and Dietetics, Occupational Therapist, Optometrist, Physiotherapist, Public Health Administrator, Radiologist, Speech Therapist & Unani Doctor.

& many more.

**Vocational** careers are occupation that requires a particular set of skills acquired through experience or training or both. Academic qualification and degrees adds value in it. Practical training and manual work is the key requirement in vocations like Plumbing, Carpentry etc. Major vocational jobs are:

### **1. Business Operations & Entrepreneurship**

Small scale businessman/ entrepreneurship, Event Management assistant, Office assistant, office clerk, data entry operator, Telephone Operator, Retail sales worker, Logistics & Supply chain worker, Courier worker, Cargo worker & Transport worker.

### **2. Hospitality, Transport & Tourism Services**

Baker & Confectioner, Butler, Chef/ Cook, Driver, Event Associate, Flight attendant, Travel steward, Food service assistant, Front desk associate, Tourist guide, Pet Worker, Travel Agent, Housekeeping assistant & Travel service provider.

### **3. Defense, Security & government Services**

Constable/Sepoy/ Sargent/ Clerk/ Trademan in Army, Air force, Navy, CISF, BSF, Railway Police, Fire fighter, police, security supervisor, security guard, armed guard etc.

### **4. Agriculture & Food**

Organic Farmer, Dairy Farmer, Floriculturist, Horticulture worker, Fisherman, Poultry Worker, Paddy Worker, Animal Husbandry Worker, Coffee and Tea Plantation worker.

### **5. Animation, Graphics & Design**

Animator, CAD Designer, Graphic Designer, Illustrator & Multimedia Designer

### **6. Apparel & Accessories**

Tailor, Fabric Cutter, Footwear Maker, Leather Accessories, Maker, Tannery worker, & Footwear Designer.

### **7. Banking & Financing Services**

Accounting Clerk, Bank Clerk, Teller/ Cashier, Insurance Agent, Micro Finance agent/ executive, Mutual Fund agent/ executive, Tally Professional, Taxation Clerk & Equity worker/ dealer.

### **8. Construction**

Draughtsman, Civil Supervisor, Civil Contractor, Mason, Plumber, Scaffold worker, Carpenter, Painter, Floor Shiners, Ceiling Designers, Demolisher, Foreman, Excavator Operator, Loader Operator, Crane Operator, Portland Operator & Structure layers.

## **9. Beauty & Wellness**

Beautician, Hair Stylist, Barber, Make-up artist, Mehandi Artist, Nail Artist, Tattoo Artist, Pedicurist/ Manicurist, Pet groomer, Skin specialist & Spa therapist.

## **10. Electronics & Hardware**

AC & Refrigeration Technician, CCTV surveillance system operator and installing technician, Computer Hardware technician, Computer Networking technician, DTH Set-top box installer & technician, Domestic Appliance Technician, Mobile Phone technician, Printing technician & TV technician.

## **11. Engineering & Technical**

Junior Engineer in Mechanical/ Electrical/ Electronics/ Chemical/ Instruments/ Communication/ Computer/ Automobile/ IT, Painter, Fitter, Turner, Draftsman, Electrician, Electronic Technician, Instrument technician, Machinist, CNC Operator, CNC Repair, Tool & Die Technician, Motor-mechanic, Motor body repairer, welder, grinder man, textile design technician, machine operators, Printing machine operator, Printing machine technician, Film maker for printing machine.

## **12. Gems & Jewellery**

Gem cutting and polishing Craftsman, Gem identifier, Jewellery Designer, Stone setter, Wax pulling, Casting Craftsman.

## **13. Early Childhood and Primary Education**

Nursery Teacher, Elementary Teacher, Library Assistant, Junior Teacher, Basic Teacher

#### **14. Healthcare Support Services**

Anaesthesia technologist, Audiology assistant, Cardiac care technician, Dental technician, Diabetes educator, Dialysis technician, Dietitian assistant, Eye technician/Optomestrist, Nurse/ midwife, Care taker, Medical lab technician, Patient care technician, X-ray machine technician, Pharmacy technician, Physiotherapy assistant & Pulmonary technician.

#### **15. IT & IT enabled services**

Computer Operator, Data entry operator, Software Testing Assistant & Stenographer

#### **16. Media & Entertainment**

Actor, blogger, choreographer, cartoonist, dancer, model, photographer

#### **17. Sales & Marketing Operations**

Automobile Sales Associate, Business Process Associate, Distribution Salesperson, Retail Sales Associate, Sales Executive.

#### **18. Sports & Fitness**

Athlete, Sportsperson, Player, Fitness Instructor, Mountaineer, PTI, Sports Coach, Yoga Instructor

#### **19. Textile & Handloom**

Hand Embroider, Machine Embroider, Dying operator, bleaching worker

& many more.
